PROFILE

Passionate Information Technology student focused on software development. Versatile in understanding both frontend and backend development. I love exploring JavaScript, though I am also familiar with other languages such as Python and PHP. My preferred frameworks include ReactJS, React Native, and Django. I am constantly seeking opportunities to learn and delve into new technologies without fear.

EXPERIENCE IN SOFTWARE

Civil Registry of Durango Software Developer

APRIL 2024- AUGUST 2024

- Development of a project for the administration of the civil registry in Coordination of Offices of Durango.
- Desktop application development with ElectronJs.
